Rippling Affiliate Getting Started Guide

Everything you need to start creating content and driving commissions

Welcome

This guide is designed to get you creating content about Rippling as quickly as possible. It covers what Rippling is, who it's for, how to talk about it compellingly, and a set of content ideas you can start working from today.

You don't need to be an HR expert to promote Rippling effectively. You need a clear understanding of the problem it solves, the specific value it delivers, and the audiences most likely to respond to it. That's what this guide gives you.

What's in this guide

What is Rippling — and the one-sentence version you actually want to use
Who buys it — ideal customer profile and what makes someone a qualified lead
Rippling's product suite — HR, IT, and Finance, briefly explained
How to talk about Rippling — key messages, proof points, what to emphasize
What makes Rippling different — vs. competitors
Content ideas — specific angles, formats, and headline starters
Sample copy — ready-to-use snippets for social, email, and blog
Keywords — non-branded search terms that perform well
Your commission plan — quick reference
Resources — links to everything useful

What is Rippling?

The one-sentence version

> Rippling is a workforce management platform that lets companies run HR, IT, and Finance in one connected system — so when something changes about an employee, everything updates automatically.

That sentence does a lot of work. Here's what makes it accurate and worth using:

"HR, IT, and Finance in one connected system" Most HR platforms do HR. Most IT tools do IT. Rippling genuinely does all three, and they're deeply integrated — not just marketing copy for a bundle of unrelated tools.

"When something changes about an employee, everything updates automatically" This is the core value prop. Hire someone: payroll, benefits, laptop, and app access are set up. Promote someone: their permissions update. Offboard someone: everything is revoked. No manual steps, no missed steps.

The problem Rippling solves

Before Rippling, most companies manage employees across a patchwork of disconnected tools: one system for payroll, another for benefits, another for IT provisioning, another for expenses. Every time something changes — a new hire, a promotion, a departure — someone has to manually update each system. This creates delays, errors, and security gaps.

Rippling replaces that patchwork with a single employee record that drives everything else. One source of truth, one place to manage the entire employee lifecycle.

The company at a glance

> Founded 2016 | HQ: San Francisco, CA | Founded by Parker Conrad
> 20,000+ customers worldwide | 600+ integrations | Valued at $13B+
> Global payroll in 185+ countries | EOR in 80+ countries
> Automates up to 90% of routine HR, IT, and Finance admin tasks

Who Buys Rippling?

Ideal Customer Profile

Understanding who Rippling is built for matters for two reasons: it helps you write content that reaches the right audience, and it helps you drive leads that are actually likely to convert — which is what earns you commissions.

Sweet spot

Rippling's core customer is a company with 10 to 500 employees that is actively scaling. They've outgrown spreadsheets and point solutions, but they're not ready for enterprise-level complexity. They want something that works across HR, IT, and Finance without requiring a dedicated IT department to maintain it.

Strong fit

- Fast-growing startups and scale-ups (Series A–C)
- Companies with distributed or remote teams
- Businesses operating across multiple states or countries
- Companies frustrated with fragmented tools (5+ systems for employee management)
- Teams spending significant time on manual HR or IT admin
- Companies with upcoming compliance needs (SOC 2, global hiring)

Weaker fit

- Sole proprietors or very early-stage (< 5 employees)
- Companies looking only for a single point solution (e.g., just payroll)
- Large enterprises with deeply custom legacy infrastructure
- Non-US companies not in Rippling's supported markets

Who to write for

The people who evaluate and buy Rippling are typically: founders and COOs at growing companies, HR managers and People Ops leads, IT managers dealing with device and app sprawl, and Finance managers frustrated with expense management. Your content should speak directly to their pain — not abstract features.

The Product Suite

HR, IT, and Finance — Connected

You don't need to be an expert on every Rippling product. What matters is understanding the big picture: three suites, deeply connected, driven by a single employee record. The tables below give you a quick reference.

Suite	What's included
HR / HCM	Payroll · Benefits · HRIS · Recruiting & ATS · Performance Management · Learning · Time & Attendance · Headcount Planning
IT	Device Management · App Management · Identity & Access (SSO) · Endpoint Security · Automated Onboarding/Offboarding
Finance	Expense Management · Corporate Cards · Spend Controls · Bill Pay · Vendor Payments

The key insight to communicate

> The value isn't any individual product — it's that they're connected. A new hire in Rippling can automatically have their payroll set up, benefits enrolled, laptop ordered and pre-configured, and app access provisioned, all from a single workflow. No IT ticket. No back-and-forth between departments. That's the story worth telling.

HR Suite — what's worth highlighting

- Payroll runs in as little as 90 seconds and supports global teams in 185+ countries
- Benefits, time tracking, and expenses sync automatically — no manual imports
- Onboarding workflows can be triggered the moment an offer is signed

IT Suite — what's worth highlighting

- A new hire can have a pre-configured laptop shipped to them before day one
- When someone is terminated, all app access is revoked automatically
- 600+ app integrations — Rippling provisions and deprovisions them all

Finance Suite — what's worth highlighting

- Expense policies are enforced automatically — no manual receipt chasing
- Corporate cards come with per-employee spend limits and real-time visibility

How to Talk About Rippling

Key Messages

These are the messages that resonate most with Rippling's buyers. Use them to anchor your content — whether you're writing a comparison article, a how-to guide, or a LinkedIn post.

1. One system, not five

The average company uses 10+ tools to manage employees. Rippling replaces the majority of them with a single platform. This message hits hardest with buyers who are already frustrated — and there are a lot of them.

> **Use it like this**
> "Most companies are managing HR in one tool, IT in another, and expenses in a third. Rippling replaces all three — and because they're connected, a change in one automatically updates the others."

2. Automation that actually works

Rippling automates up to 90% of routine admin work. The differentiator is that the automation is built on real data connections — not workarounds or Zapier flows. When an employee is promoted, their payroll, permissions, and benefits update without anyone touching anything.

> **Use it like this**
> "Onboarding a new employee used to take our HR team half a day. With Rippling, it's a single workflow — payroll, benefits, laptop, and app access are all handled automatically."

3. Built for companies that are scaling

Rippling is not a small-business product that happens to have enterprise features bolted on — it was built from the start for companies that are growing fast and need systems that can keep up. This positions it well against legacy HR tools that feel dated and against lightweight tools that can't handle complexity.

> **Use it like this**
> "Rippling is built for companies in growth mode — the kind that go from 20 to 200 employees in two years and need their systems to scale with them, not become the bottleneck."

4. Global-ready

Rippling runs payroll in 185+ countries, provides Employer of Record (EOR) services in 80+ countries, and supports 50+ languages. For companies building distributed or international teams, this is a significant differentiator.

Use it like this

"Whether your team is in San Francisco, London, or Bangalore, Rippling handles payroll, compliance, and benefits in one place — no separate international payroll vendor required."

What Makes Rippling Different

Vs. the Competition

You'll create a lot of comparison content. Here's how Rippling stacks up against the tools your audience is likely considering:

Competitor	What they do well	Where Rippling wins
Gusto	Simple payroll and benefits for small businesses	Rippling adds IT management and Finance, scales to 1,000+ employees, supports global payroll
BambooHR	HR records, performance management, and reporting	Rippling includes payroll, IT, and Finance — BambooHR requires integrations to do what Rippling does natively
Workday	Enterprise HCM with deep customization	Rippling is significantly faster to implement, more modern UX, and includes IT and Finance without add-ons
Deel / Remote	Global EOR and contractor payments	Rippling combines EOR with full domestic HR, IT, and Finance — not just global hiring
ADP	Payroll processing at scale, especially for large enterprises	Rippling is more modern, includes HR and IT, and is far easier to use and implement

Important note

Keep comparison content factual and fair. Focus on genuine differentiators rather than knocking competitors unfairly. Accurate comparisons build trust — and trust converts.

Content Ideas

What Works — and Why

The content that drives the most demo bookings tends to be specific, educational, and aimed at buyers who are actively looking for a solution. Below are proven formats and angles — use them as starting points and adapt them to your audience and voice.

Comparisons & Alternatives

High purchase intent, strong SEO value. People searching "Rippling vs. Gusto" or "best HR software for startups" are already in buying mode. Rippling's breadth gives you a lot to work with.

Blog / SEO

Rippling vs. Gusto: Which is Right for Growing Companies?

Compare on payroll features, IT management, global support, pricing approach, and who each platform is actually built for. Be honest — this earns trust.

Ready-to-Use Snippets

Use these as starting points — adapt them to your voice and audience. Don't copy them verbatim; the goal is to give you a launching-off point, not a template.

LinkedIn Posts

> **Option A — Problem hook**
>
> Most companies are running HR in one tool, IT in another, payroll in a third, and expenses in a fourth.
>
> Every time someone gets hired, promoted, or leaves — someone manually updates all four systems. Or forgets to.
>
> Rippling replaces the whole stack. One employee record drives HR, IT, and Finance automatically. When something changes, everything updates.
>
> If you manage a team and you're spending more than a few hours a week on admin, it's worth 20 minutes to see what Rippling actually does. [affiliate link]

> **Option B — Proof point hook**
>
> Rippling can run payroll in 90 seconds.
>
> Not because it cuts corners — because benefits, time tracking, and expenses all sync automatically. There's no import. No reconciliation. Just run it.
>
> It also provisions new hire laptops, sets up app access, and handles global compliance in 185 countries — all from the same platform.
>
> If your HR stack involves more than two tools, it's worth a look: [affiliate link]

Blog Introduction Hook

> If you've spent time managing a growing team, you know the drill: new hire joins, and suddenly you're juggling payroll setup, benefits enrollment, IT provisioning, and app access — each in a different system, each requiring its own update.

> Rippling is built to eliminate that entirely. It's a workforce management platform that connects HR, IT, and Finance in a single system — so when an employee record changes, every downstream tool updates automatically.
>
> In this post, we'll walk through what Rippling actually does, who it's best suited for, and how it compares to the tools you're probably already using.

Email Newsletter Snippet

> Subject: A tool worth knowing if you're managing a growing team
>
> If your company uses more than three separate tools to manage employees — payroll, benefits, IT, expenses — Rippling is worth 15 minutes of your time.
>
> It's a workforce management platform that combines all of them. Not as a bundle of integrations, but as a genuinely connected system: when you hire someone, their payroll, benefits, laptop, and app access are all set up from one workflow.
>
> 20,000+ companies use it. Payroll runs in 90 seconds. And it handles global teams across 185+ countries.
>

Keywords & SEO

Non-Branded Search Terms That Convert

These are the types of search queries your audience uses when they're in evaluation mode. Target these in your content — not branded terms like "Rippling HR" (which you're not allowed to bid on in paid search).

High intent — use these for pillar content

- Best HR software for small businesses
- Best HRIS for growing companies
- HR software with payroll and benefits
- All-in-one HR and IT management platform
- HR software that includes device management
- Gusto alternatives / BambooHR alternatives / Workday alternatives

Problem-aware — use these for top-of-funnel

- How to automate employee onboarding
- How to manage remote employee IT
- HR software for international teams
- Employer of record vs. HR software
- How to run global payroll
- How to automate offboarding

Audience-specific — use for niche targeting

- HR software for startups
- HR tools for Series A companies
- People ops software for tech companies
- IT management for fast-growing teams
- Expense management software for SMBs

Commission Plan & Resources

Quick Reference: How You Earn

You earn at two points in the Rippling sales funnel. Both commissions can be earned from the same lead.

Milestone	Your Commission
SQO — Completed qualified demo	**$600**
Closed Won — Signed customer	**$1,000**

Funnel reminder

MQL (interest shown) → SQL (demo scheduled) → SQO (demo completed and qualified — $600) → Closed Won (signed — $1,000)

Your job: drive qualified traffic to your affiliate link. Once a lead books a demo, the Rippling sales team takes over.
