deel.

Content Guidelines

You already know Deel. You already send traffic. Now it's time to turn that traffic into revenue that actually counts. Not just clicks. Not just pageviews. **Sales Qualified Opportunities.**

Every challenge is engineered around the type of content that drives qualified pipeline for Deel — which means higher conversion rates, longer cookie windows, and bigger commissions for you beyond the challenge payouts themselves.

Universal participation criteria

Before you dive into the challenges, here's what every submission needs to qualify as "Approved." These standards apply across all challenges.

Referral link requirements

- Every piece of content must include your unique Deel referral link (PartnerStack tracking link). Content without a working referral link will not be reviewed.
- UTM parameters must be intact. Don't strip or modify tracking parameters from your assigned link.
- Links must point to the correct Deel landing page for the campaign. If a specific landing page is provided in the mission brief, use that URL.

Content longevity

- All published content must remain live and publicly accessible for a minimum of 12 months from the date of approval.
- If content is taken down, modified substantially, or referral links are removed within 12 months, the payout may be revoked.

Brand safety and quality standards

- Content must be original, substantive work. AI-generated "filler" articles, spun content, or content that reads as automated will be rejected. You're welcome to use AI tools to assist your workflow, but the final product must reflect genuine expertise and editorial judgment.
- No misleading claims about Deel's pricing, features, or competitive positioning. Accuracy matters. When in doubt, check deel.com or reach out to your partner manager.
- Proper disclosure is required. Affiliate relationships must be disclosed per FTC guidelines

(or your local equivalent). Include clear language such as: "This post contains affiliate links. We may earn a commission at no extra cost to you."

- No negative or disparaging competitor content. Comparisons must be factual, balanced, and professional. Position Deel on its strengths, not by tearing others down.
- Content must not appear on domains or channels associated with adult content, hate speech, misinformation, or any category that conflicts with Deel's brand standards.

Eligibility

- You must be an active Deel affiliate on PartnerStack with no unresolved violations of PartnerStack's terms of service or Deel's affiliate program agreement.
- You may submit to multiple challenges simultaneously. There's no limit to the number of challenges you can complete; however, only one submission per challenge will be accepted. If your submission is rejected, you may resubmit once with a revised asset within 14 days of the rejection notice.
- Content will only be accepted from websites, blogs, or social accounts that have been active for at least three months and demonstrate an authentic, engaged audience. Deel reserves sole discretion to determine whether a channel meets this standard.
- Content must be newly created for this program. Pre-existing content will not qualify, even if updated or republished.
- Deel reserves sole discretion to determine eligibility of any submission

All challenge payouts are taxable income. You're responsible for any applicable tax reporting and obligations in your jurisdiction. Deel reserves the right to modify challenge terms, reward structures, or discontinue the program at any time.
